bringing communities together

Exhibition Options

Review the floor plan of the exhibition area below, to identify the best location for your company. There are various size options (2x2, 3x2 or 4x2) that each come with a standard shell scheme, fascia board with your company name, a power source, spot light as well as a small table and chair. The table on page 2 details each exhibition stand option, and more detailed floor plans and exhibition information can be found on page 3 and 4 of this document.

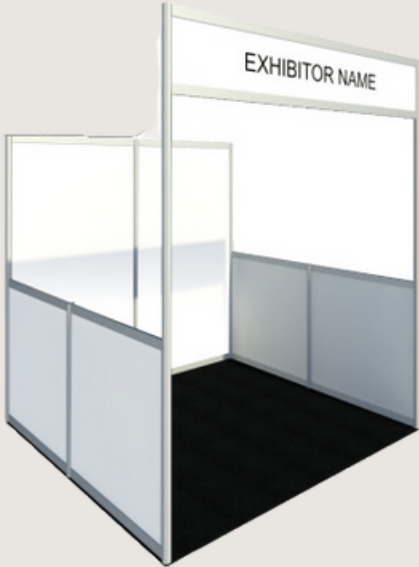

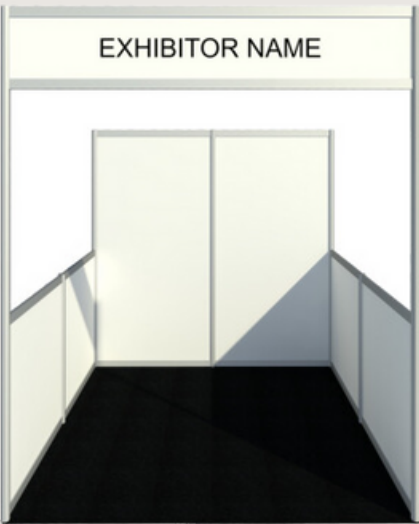

All exhibition tickets include a single delegate to the conference to participate in all activities and discussions. You are able to further customise and furnish your stand as you wish, however we urge you to use Expo Solutions, who are building the shell schemes for easier logistics. Please contact us after you have made your booking to discuss this.

Stand Category	Number Available	Stands Included	Exposed Opening
2x2 Corner Stand	5	1, 3, 12, 13, 23	Option to have 2 openings (front and side)
2x2 Middle Stand	12	2, 6, 8-11, 14-17, 21, 22	Only front wall can be exposed
3x2 Corner Stand	1	4	Option to have 2 openings (front and side)
3x2 Middle Stand	1	19	Only front wall can be exposed
4x2 Corner Stand	2	5, 20	Only 2m of the 4m long front wall will be exposed
4x2 Separate Stand	2	24, 25	Option to have 2 openings (front and side)

The above table details the exhibition stands as per the original floor plan on page 1, however the design allows for flexibility and adjustments based on demand. For example, where there are a bank of 3 of the 2x2 stands, this could easily be converted to 2 of the 3x2 stands. Or 2 of the 2x2 stands could be converted into a 4x2 stand.

Please see model of a standard 2x2 stand to get an idea of the stand composition.

The below images show the entire area that will be used for the conference at the Indaba Conference Venue - Kgotla Function Room
